Hazards identification

Emergency overview

HARMFUL IF INHALED, ABSORBED THROUGH SKIN OR SWALLOWED. CONTAINS MATERIAL THAT

Responsible name

Regulatory Affairs Department

MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA.

Harmful by inhalation, in contact with skin and if swallowed. Do not breathe vapor or mist. Do not ingest. Do not get in eyes or on skin or clothing. Contains material that may cause target organ damage, based on animal data. Use only with adequate ventilation. Keep container tightly closed and sealed until ready for use. Wash thoroughly after handling.

Potential acute health effects due to overexposure

Inhalation May be toxic by inhalation. Exposure to decomposition products may cause a health hazard. Serious effects

may be delayed following exposure.

Ingestion May be toxic if swallowed. Toxic in contact with skin. Skin

No known significant effects or critical hazards. **Eyes**

Potential chronic health effects due to overexposure

Carcinogenicity No known significant effects or critical hazards. Mutagenicity No known significant effects or critical hazards. **Teratogenicity** No known significant effects or critical hazards. **Developmental effects** No known significant effects or critical hazards. **Fertility effects** No known significant effects or critical hazards.

See toxicological information (section 8)

3. Composition/information on ingredients

CAS number BENZYL ALCOHOL 100-51-6 30 - 60 10 - 30 Ethanolamine 141-43-5 ethylene glycol monobutyl ether 111-76-2 10 - 30 Benzenesulfonic acid, C10-16-alkyl derivs. 68584-22-5 1 - 5

SARA 313 (Form R - Reporting requirements)

CAS number **Product name** Concentration

ethylene glycol monobutyl ether 111-76-2

SARA 313 notifications must not be detached from the MSDS and any copying and redistribution of the MSDS shall include copying and redistribution of the notice attached to copies of the MSDS subsequently redistributed.

California Prop. 65

WARNING: This product contains less than 0.1% of a chemical known to the State of California to cause cancer.

Ingredient name Cancer Reproductive No significant risk level Max acceptable dosage

sulphuric acid Yes Nο Nο Nο

First aid measures

Eye contact Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes,

occasionally lifting the upper and lower eyelids. Get medical attention immediately.

Skin contact In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing

contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get

medical attention immediately.

Inhalation Move exposed person to fresh air. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical

attention immediately.

Ingestion Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Get

medical attention immediately.

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are **Protection of first-aiders**

still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing

thoroughly with water before removing it, or wear gloves.

Notes to physician In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may

need to be kept under medical surveillance for 48 hours.

Fire-fighting measures **5** .

Flammability of the product

In a fire or if heated, a pressure increase will occur and the container may burst.

Extinguishing media

Suitable Use an extinguishing agent suitable for the surrounding fire.

Special exposure hazards Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action

shall be taken involving any personal risk or without suitable training.

Hazardous thermal decomposition Decomposition products may include the following materials:

products

carbon dioxide carbon monoxide nitrogen oxides

Special protective equipment for

fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA)

with a full face-piece operated in positive pressure mode.

Control and preventive measures 6.

Storage

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Ingredient	Exposure limits
BENZYL ALCOHOL	AIHA WEEL (United States, 5/2010). TWA: 10 ppm 8 hour(s).
Ethanolamine	OSHA PEL (United States, 6/2010). TWA: 3 ppm 8 hour(s). TWA: 6 mg/m³ 8 hour(s). ACGIH TLV (United States, 2/2010). TWA: 3 ppm 8 hour(s). TWA: 7.5 mg/m³ 8 hour(s). STEL: 6 ppm 15 minute(s). STEL: 15 mg/m³ 15 minute(s). OSHA PEL 1989 (United States, 3/1989). TWA: 3 ppm 8 hour(s). TWA: 8 mg/m³ 8 hour(s). STEL: 6 ppm 15 minute(s). STEL: 6 ppm 15 minute(s). STEL: 15 mg/m³ 15 minute(s). STEL: 6 ppm 15 minute(s). STEL: 15 mg/m³ 15 minute(s). STEL: 15 mg/m³ 10 hour(s). TWA: 8 mg/m³ 10 hour(s). TWA: 8 mg/m³ 10 hour(s). STEL: 6 ppm 15 minute(s). STEL: 15 mg/m³ 15 minute(s).
ethylene glycol monobutyl ether	OSHA PEL (United States, 6/2010). Absorbed through skin. TWA: 50 ppm 8 hour(s). TWA: 240 mg/m³ 8 hour(s). OSHA PEL 1989 (United States, 3/1989). Absorbed through skin. TWA: 25 ppm 8 hour(s). TWA: 120 mg/m³ 8 hour(s). NIOSH REL (United States, 6/2009). Absorbed through skin. TWA: 5 ppm 10 hour(s). TWA: 5 ppm 10 hour(s). ACGIH TLV (United States, 2/2010). TWA: 20 ppm 8 hour(s).

Personal protection

Respiratory **Hands**

None required. However, use of adequate ventilation is good industrial practice.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

6. Control and preventive measures

Skin Personal protective equipment for the body should be selected based on the task being performed and the

risks involved and should be approved by a specialist before handling this product.

Eyes Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is

necessary to avoid exposure to liquid splashes, mists or dusts.

Methods for cleaning up

Small spill Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble.

Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal

container. Dispose of via a licensed waste disposal contractor.

Waste disposal Disposal of this product, solutions and any by-products should at all times comply with the requirements of

environmental protection and waste disposal legislation and any regional local authority requirements.
